

## Cutoff Wall – Phase 2

**Project Overview**

**Client:**

**USACE– Michels Corp**

**Location:**

**Alton, IL**

**Completion Date:**

**July 2017**

**Kamadulski was awarded a multi-million dollar subcontract from Michels/MI-CON in support of the constructing an 870 linear foot soil bentonite slurry wall. Kamadulski's scope of work consisted of all aspects of work including work platform construction, 24/7 spoil management crew, and restoration of roads and bike trails. This project had extensive demolition and restoration of the Alton Marina parking lot, MCT bike trails, IDOT roads, and Argosy Casino parking lots. Kamadulski completed degrading and restoration of the levee with placement of approximately 21,000 cubic yards impervious clay fill per the plans and specifications, including all testing and QACQ. Kamadulski was subcontracted to provide all survey and GPS control for all aspects of work on this project.**
