

# Nine Mile Ln Road Improvement

## Project Overview

**Client:**  
**IDOT– Macoupin County**  
**Highway Department**

**Location:**  
**Modesto, IL**

**Completion Date:**  
**October 2020**

**This project involved two segments of Nine Mile Lane. The south segment, #1, is at the intersection of Otten Road & Nine Mile Lane. The north segment, #2, is at the intersection of Campbell Road and Nine Mile Lane. The two segments were separated by 0.805 miles and were located approximately 3 miles east of Modesto, Illinois. The work on this project consisted of construction of drainage structures, excavation/embankments, soil-cement base course, aggregate base course, bituminous surface treatment, and excavation of ditches. The following were the major items of work:**

- 32,000 CY Earth Excavation**
- 6,000 Ton Aggregate Base Course**
- 14,000 SY Soil Cement Base Course 12"**
- 250 LF Precast Concrete Box Culverts**
- 1,500 LF Storm Sewer (Reinforced Concrete Pipe & Corrugated Metal Pipe)**
