

Wood River Deep Cutoff Wall– Phase 2

Project Overview

Client:

USACE- Treviicos

Location:

Wood River, IL

Completion Date:

November 2019

Kamadulski was awarded a subcontract in the amount of 2.1 million dollars from Treviicos in support of constructing a 1000 linear foot cement soil bentonite wall. Kamadulski's scope of work consisted of all aspects of work including work platform construction, 24/7 spoil management crew, and restoration of roads and MCT bike trails. Kamadulski completed extensive degrading and restoration of the levee with impervious clay fill per the plans and specifications, including all testing and QACQ. Kamadulski was subcontracted to provide all survey and gps control for all aspects of work on this project.
